## EDUCATION

2020 - 2023

### Bachelor's degree in Computer Engineering, Clemson University, Clemson, South Carolina

- **Senior Design Project:** Designed and implemented a web-based parking utilization tracking system

2017 - 2023

### Bachelor's degree in Computer Information Systems, Lander University, Greenwood, SC

- Minor In Mathematics
- **Senior Design Project:** Designed a Patient Image access system for Greenwood Genetic Center

## EMPLOYMENT HISTORY

NOV 2023 - PRESENT

### Website Administrator, The Cooks Station, Greenville SC

- Maintained web content and design
- Ensured a safe and efficient user experience
- Implement innovative features to enhance user engagement and increase website traffic
- Managed and maintained website security measures to protect user data and prevent cyber threats

JUN 2020 - AUG 2022

### Software Engineering Intern, Duck Creek Technologies, Columbia SC (REMOTE)

- Designed and implemented regression testing tool
- Planned and led demonstrations of current projects
- Assisted in the research and development of new software features and functionalities
- Aided in bug tracking and resolution
- Created regression testing tool for in-house use
- Implemented bug fixes and updated deprecated syntax
- Worked in a fast-paced team setting

AUG 2018 - MAR 2020

### Sales Associate, Pier 1 Imports, Greenwood SC

- Preserved up-to-date knowledge on current sales and inventory
- Providing exceptional customer service and creating a positive shopping experience for customers through personalized recommendations and assistance.
- Providing excellent customer service and ensuring customer satisfaction to build and maintain long-term relationships with customers, resulting in increased sales and customer loyalty.
